

Webmasters Report – April 13, 2023

The division's web site <https://seacoastnmra.org> has been updated with all reports, documents, photos and/or links available at this writing, which includes the Switch Tower, NER Coupler, NMRA Turntable, links to Great Falls Model Railroad Club publications, Board of Director's meetings, lots of presentations and model railroading information and connections to NMRA web sites worldwide.

Also maintained is a pre-production site hosted at <https://seacoastnmra.com>. It is used to test new features and test the posting of new/changed documents and images prior to copying them over to the production web site. Accordingly, most of the time both sites have the same content.

If you wish to add content to the web site or have ideas to improve it, please feel free to call or email me to discuss your proposal. Routine updates to the web site are authorized by the President and sent to me via email for posting, while enhancements or adding other content materials may need board approval.

Respectfully submitted,

Dave Delorey, Webmaster, Seacoast NMRA
